

Integrated Management System Policy

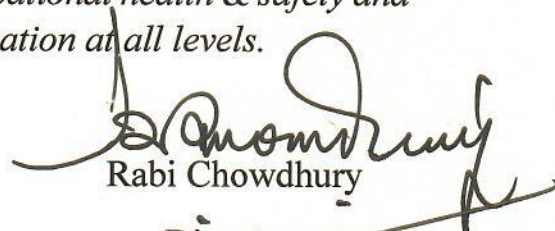

Quality, Environment, Occupational Health & Safety and Energy Policy

(ISO 9001, 14001, 45001 & 50001)

We, at Dhariwal Infrastructure Limited, strive to achieve and sustain leadership in generation of electricity, through our commitment to:

- *Comply with legal, statutory and other requirements relating to quality of electricity, environmental aspects, occupational health & safety and energy conservation.*
- *Maintain & continually improve the quality, environmental, occupational health & safety and energy management systems covering all business risks in the context of the organization.*
- *Meet customer requirements, enhance customer satisfaction and utilize resources optimally through leadership.*
- *Mitigate pollution originating from power generation process*
- *Eliminate and reduce the potential and severity of injuries and adverse impact on the health and safety of human resources.*
- *Improve energy performance by reducing specific consumption, controlling energy losses, supporting design & procurement of energy efficient products & services, and by making available information & resources to meet objectives & targets.*
- *Set and review the effectiveness of quality, environmental, occupational health & safety and energy objectives and targets.*
- *Create awareness, enhance competence and develop a culture amongst all concerned with respect to quality, environment, occupational health & safety and energy obligations through consultation and participation at all levels.*
